EXPERIENCE

Monke Labs -Dubai (As a Frontend Developer)
2023 - 2024

- Developed and maintained high-performance, responsive web applications using React.js.

- Collaborated with cross-functional teams to define and implement innovative solutions.

- Optimized components for maximum performance across a vast array of web-capable devices and browsers.

- Utilized Redux for state management and integrated APIs.

- Worked on a web application "NEBE" which is a business management website used for keeping all information of CREW, LEADS and all members of company. This web application have features like "Digital Business card", and "Event Badges".
